

FlakFinger™ Welding Heat Shield

Adjustable welding heat shield for fingers and hand

Every TIG welder knows that hand protection can be a balancing act -- the need for finger control and finesse at odds with the need for heat resistance. Black Stallion® solves the problem with our new FlakFinger™ heat-shielding sleeve. Slide the FlakFinger™ over your TIG glove, secure the adjustable strap, and keep your fingers cool and comfortable while moving the puddle along.

SPECIFICATIONS

- Leather strap keeps the FlakFinger™ secured throughout your weld
- Unique design allows for single-finger or two-finger protection
- Reinforced "tail" extends heat protection through length of hand
- Convenient adjustable sleeve and strap system provides a customized fit
- Versatile "tail" can be positioned to provide either side hand or back of hand protection
- Great for TIG welding aluminum, stainless steel, pipe, and more
- Also fits MIG and Stick gloves for propping, sliding, and shielding

Unique design allows for single-finger or two-finger protection and side hand or back of hand protection

The versatile FlakFinger™ works with most TIG, MIG, and Stick gloves for propping, sliding, and shielding
