

LPR-100

Half Mask Respirator

Quick Specs

Filter Type

P100 Particulate Filter

Provides 99.97% filtration of airborne particles and oil aerosols

- Stainless steel (hexavalent chromium), galvanized steel (zinc oxide), steel/manganese alloys, aluminum, cadmium and lead fumes
- Optional P100 nuisance level OV relief filters are available*

Assigned Protection Factor (APF) 10

Certifications NIOSH 42 CFR 84

Weight 4.7 oz. (130 g)

Size Options S/M or M/L

Fit Testing Required for mandatory use

P100 filters capture airborne particles and oil aerosols

Ideal for use with a welding helmet

Extreme low-profile design provides maximum field of vision and does not interfere with protective eyewear, making it an optimal solution for use with a welding helmet.

Ergonomic mask design allows user to feel more comfortable and less constricted without compromising the efficiency and effectiveness of the mask.

Large non-return exhaust valve reduces heat buildup and user fatigue.

Minimal dead air space limits re-breathing exhaled air making user more comfortable.

Convenient turnbuckles make changing filters easy and quick, reducing downtime.

Four-point head strap adjustments with integrated comfort cushion provide a customized and comfortable fit.

Exclusive pleated filter design provides additional surface area to reduce breathing resistance while minimizing filter size.

Wrap-around spark guard protects filters from spatter and other debris

Innovative filter media will not deteriorate in humid conditions, extending filter life.

Made with medical-grade materials ensuring user it is free of latex and silicone; odor-free and non-allergenic.

P100 nuisance level OV relief filters (optional) feature an added layer of carbon that helps remove nuisance level organic vapor odors*

**P100 nuisance level OV relief filters are designed for use with organic vapor concentrations not exceeding OSHA's PELs or other applicable government occupational exposure limits, whichever is lower.*
